### From Microsoft to Tomatoes

One day, an unemployed man went to apply for a job with Microsoft as a cleaner. The manager said: "Let me have your e-mail address, so that I can send you a form to complete and tell you when you can start." The man said that he had no computer or email address. The manager: "Well, then, that means that you virtually don't exist and therefore can't be employed."

The man looked at the last £10 in his wallet and thought of buying tomatoes in **bulk**. Within less than 2 hours, he sold all the tomatoes at 100% **profit**. Repeating the process several times that day, he ended up with almost £100 before going to sleep that night. Getting up early every day and going to bed late, he **multiplied** his profits quickly. After a short time he bought a **cart** to transport several dozen boxes of tomatoes.

By the end of the second year, he became the owner of a **fleet** of trucks and the manager of a staff of a hundred **former** unemployed people, all selling tomatoes.

Planning for the future of his wife and children, he decided to buy life insurance. An adviser asked him for his e-mail address in order to send the final documents electronically. When the man replied that he has no e-mail, the adviser felt astonished and said: "How did you make such wealth without Internet and e-mail? Just imagine where you would-be now, if you had been connected to the internet from the very start!"

After a moment of thought, the tomato millionaire replied:

Even with the lack of technology, with determination and the required skills one can make a difference.

## Reading

Read the following text and do the tasks below.

## Pay it Forward

On March 27, 2013, John Sweeney, a **plumber** from Ireland, started a Facebook page called **Suspended** Coffees. His message was simple: Buy a cup of coffee for a stranger, because an act of kindness can change a life and make a difference. Eight hours later, the page had attracted more than 20,000 likes.

Suspended coffee is a tradition that comes from Naples, Italy, and dates to the 20<sup>th</sup> century. When customers buy coffee, they also pay in advance for a cup to be given to somebody else; usually someone who otherwise couldn't **afford** it. This initiative was forgotten, but then it **revived** again in 2011. That's when "Suspended Coffee Day" started to be celebrated each December.

You can buy it for anyone in need. It can be for the homeless person you pass by every day on the street, a stressed student in the middle of exams, a mother of children who can't afford coffee. It may be a well-dressed man whom you may not think from his appearance that he's in need but he may be in his third month of **job hunting**. Someday people will live in space. By the end of this century, there will be permanent **settlements** that will allow people to lead a normal life in space. Hundreds of astronauts are going to work and live in the space station, which will take ten years to build. In some way, living on the moon will be easier than living on a space station and it will be cheaper because people won't bring everything from the Earth by **rockets**. The space city will be like a **gigantic** glass wheel that will contain buildings, factories and special meeting places. Inside it, people won't live differently from small towns on the Earth. It will have air so that inhabitants can breathe and they won't need to wear special space-suits inside the buildings. Scientists also believe that they will **obtain** water from a large ice lake on the moon. People won't have to do housework because robots will do that for them. Food won't be a problem, as settlers won't need to eat. **Instead, they will take a pill three times a day.** **The first group of astronauts will live on the moon for six months** and then they will return to the Earth and another group will travel. ### Ecological Cities

When we think about the future, we tend to **assume** that most things will stay the same. This is almost never the case. We are experiencing a technological **progress** every month now.

The world is changing and the changes are very **dramatic**. Imagining future cities with modern technology appears as a **dynamic** solution to society's recent problems.

Some recent researches have suggested that we need to think about the way we imagine future cities, and to focus on some forms of alternative energy such as solar power, wind power, and water power which lead to environmental **sustainability**.

We need to answer questions about what can be sustained and what cannot, where cities can be located and where they cannot, and how we might travel in and between them and how we can physically live and work together.

We may want our future cities to **prioritize** environmental **renewal**. We need to prevent environmental **degradation** and stop the expansion of deserts. Future cities can collect water and use solar power to **irrigate** the dry land. Future cities should be surrounded by rivers and provided with renewable energy resources and green vehicles heading towards more ecological forms of public transport.

Imagining these cities helps us understand how we want our future lives and tomorrow's world to look like. It will be better to rethink about our health, other species and the planet we share.

## Late to Go Back

Sam walked into a cake shop, after he'd finished his work, to buy his daughter a birthday cake. It was about four o'clock and the store usually closes at five. So he should make his mind quickly and decide what he should buy. Sam asked himself "Which one should I choose?" He began wandering in the shop watching the various kinds of cakes which were kept in the refrigerators around. The cakes looked very delicious and tasty so that it was difficult for Sam to choose.

Time was passing but in vain. Sam couldn't decide yet, when he heard the chef saying "Come on. Hurry up, please, we are about to close the store."

"No wait please, I should choose the most suitable and delicious cake." Sam said **sorrowfully**. Sam's eyes kept moving from one refrigerator to another, but all of the **options** looked so good and he couldn't make a decision yet.

"Try to be quick Man, make up your mind, we have to close," the **impatient** chef said. Suddenly, the chef had enough and asked Sam to leave immediately. Sam walked out of the shop empty-handed feeling depressed and frustrated. He wanted them all, but ended up with nothing because he couldn't choose any.

Think of what happened to Sam. It's just that we're all Sam and the world is that cake shop.

We have extremely large numbers of options available to us, but if we don't make a decision about our career, education, relationships, investments, or other important issues, we end up empty-handed.

### Uses of Past Progressive

The **Past Progressive** is used when we talk about something which was happening at a specific time in the past.

An action going on at a certain time in the past.	<i>He was playing football at 10 am yesterday.</i>
To actions were happening at the same time (the actions do not influence each other)	<i>Anne was writing a letter while Steve was reading the newspaper.</i>
To actions occurring at same time but one action began earlier and was in progress when the other action occurred.	<i>When I was having breakfast, the phone suddenly rang. I was walking down the street when it began to rain.</i>

We use the **past simple** to express an event that began and ended in a specific time in the past.

To talk about actions or processes that happened once or repeatedly in the past and that are completed. (key words: 'yesterday, last month, last year, two weeks ago, in 1999' etc.)	<i>"I bought a new car two months ago."</i>
For actions that happened consecutively in the past which means one after the other in a short time:	<i>"Sue bought a book, went home and started to read it."</i>
When an action started in the past while another one was ongoing:	<i>"We were walking down the street when the accident happened."</i>

### All are Involved Without Exception

Do you think that all individuals can make decisions?

Here are some examples of successful people with Down's Syndrome who have proved that they have been really good at making decisions and they achieved their aims.

From an early age, Isabella Springmuhl Tejada decided to follow the footsteps of her grandmother, who was a designer. As a child, Isabella would create clothes for her dolls, but playing **eventually** turned into work when she **enrolled** in a fashion course. Her designs aimed specifically at people with Down Syndrome.

Springmuhl had her first big showcase in 2015, where she sold her complete collection. The success of her show **garnered** international attention, and in 2016 her designs were shown at London Fashion Week, which was followed by another exhibit in Rome.

Sujeet Desai is from Buffalo, New York. He graduated from high school. Two years later, he decided to study music and graduated from Berkshire Hills Music Academy. Now he is a famous musician. All in all, Desai can play seven instruments. His greatest **accomplishment** so far was his 2015 performance at Carnegie Hall, for which he received a **standing ovation**.

Pablo Pineda is an actor and educator most well-known for being the first European with Down Syndrome who made his decision to obtain a university degree. In 2009, he won the Silver Shell Award at the International Film Festival for his role in YoTambien, a film about a university graduate with Down Syndrome. Although he still acts, Pineda is currently working on **implementing** an international strategy to increase employment opportunities for people with disabilities. ## Back to Life

Frane Selak was born in Croatia in 1929. He led a **relatively** unremarkable life as a music teacher. Selak's near-death experiences began in January 1962 when he was travelling by a train from Sarajevo to Dubrovnik. The train left its railway tracks and ended up in a river. Fortunately, an unknown person pulled him to be safe, while 17 other passengers drowned. The next year, Selak boarded a plane from Zagreb to Rijeka. Unfortunately, he was blown out of its door and luckily landed in a **haystack**; the plane crashed, killing 19 people but Selak survived. Three years after that, in 1966, he got on bus. The bus **skidded** on the road and fell into a river, drowning four passengers, and by **sheer** luck Selak swam to the shore with only a few cuts and bruises.

In 1970, the fuel in his car's tank exploded on the motorway. But Selak just escaped with his life. The final famous disaster was in 1996 when a truck came **barreling** towards his car as he was driving around a mountain road. Selak was ejected from the car but he managed to hold onto a tree, and watched his car in horror **plummet** down.

In 2003, two days after his 73<sup>rd</sup> birthday, Selak won the lottery in Croatia. With this, he bought a luxurious home, only to have a change of heart and sell it in 2010. He returned to a **humble** life with his fifth wife.

What happened to Selak seems to be far more dramatic than anything Hollywood could **cook up**. But was it true what happened to Selak?

Suppose it is true, still we can't tell whether he is the luckiest or the unluckiest man in the world. Whatever happened along the way, Frane's story has a happy ending – or at least he thought it has.

She looked helplessly watching in despair. Suddenly the pharmacist's brother kneeled asking her, "tell me, sweetie, why do you need a miracle?" Without thinking, "I don't know, the doctor said that my brother needs a miracle for an operation not to die." "Is this pound enough?" ## Hurry up Before the Gates are Shut!

Once, a king and a lazy man named Hani were very good friends. One morning, the king said, "Why don't you work to earn some money?" Hani said, "No one offers me a job. My enemies told everyone that I never do any work in time." The kind king said, "You can go into my **treasury** and collect as much wealth as you can, but you have to finish before sunset." Hani was so happy and rushed home to tell his wife. She said, "Go and get the gold coins and **gems** now." He said: "I cannot go now. I am so hungry. I'd like to eat first."

After lunch, he took a nap for an hour. Then in the late afternoon, he picked some bags and went to the palace. On the way, he felt hot so he sat under a tree to rest and drink some water. Two hours later, when he wanted to move on, he saw a man showing some magic tricks. He stopped to watch for an hour again. On the way to the palace, he met an old friend and chatted with him for some time. When he reached the palace, it was already sunset time. The palace gates had been shut.

Hani lost a golden chance because he had not learnt the value of time. If Hani worked hard, he wouldn't be poor. This story teaches us that once time is spent, it will never come back again.

## Messages to and from Outer Space

If you look up at the stars, you might wonder if anyone is really out there. You might also **wonder** if they have found as many strange ways to communicate with each other as we have. The wish to communicate with the outer space has always been there in our minds. As the 20<sup>th</sup> century began, interest in the possible life on Mars and the possible **civilizations** there led to a search for signals. Could we communicate with another planet? How might we look for signals and messages from other worlds? An example of how we might receive communications from the planet was mentioned in 1896 when a newspaper article entitled "A Signal from Mars" had offered one. In the late 19<sup>th</sup> and early 20<sup>th</sup> centuries the idea of wirelessly sending and receiving waves through the air, was developed. New methods of searching for communications from space were offered too. In 1901, engineer Nicola Tesla made the **astounding** claim that he was receiving radio communications from Mars. His story was picked up and reported in the press.

The Media was **captured** by the idea of communicating with Mars but it did not find much serious interest from scientists. In the 1960s a number of other scientists began searching for signals showing the existence of another life elsewhere in the **universe**. As it became increasingly clear that there was no intelligent life on other planets in the solar system, it became possible to detect signals from much farther away. Radio signals were detected to look for life or civilizations out in the **galaxy** but none was proved, yet most of us still look at the sky and wonder if there is someone trying to contact us.

### Do Animals Have a Language?

Language is considered a very complex form of communication that occurs among humans who use words while talking to express their needs and they cry and make faces when they want to express feelings. Animals also show **signs** of communication such as a bird singing a song or a dog **wagging** its tail when excited. However, do animals have their language? Scientists are still unsure about this question. Researchers say that animals do not have a true language like humans. However, they do communicate with each other with sounds and **gestures**. Children show these same forms

of communication as babies when crying and gesturing, but they slowly learn the words of language and use them as a form of communication.

So what about animals such as dogs that understand **commands** or birds that can "talk"? Dogs can be trained to follow certain commands such as 'sit', 'come' and 'roll over', but does this mean they understand language and use it as well? Dogs are known to be experts at reading their owners, intentions and that they do not respond to actual words but the tone in which it is said.

There is no doubt that animals communicate with each other to one degree or another in **response** to different **motivations** such as hunger or fear.

Human language is creative and consists of unique characteristics that give us the ability to **engage** in **intellectual** and logical ways. However, it can be said that although animals do not have a true language like humans, they can still communicate.

## Overseas Pen Friends

Most people are curious about different countries and their cultures. So, some tend to make friends from all around the world.

Making friends from all over the world is easy nowadays. We only have to sign up to a pen pal website under the supervision of parents. When we create a profile, we will be asked to fill out basic details about ourselves; like our interests, the country we are from, and our birth date. We will be able to have conversations with new friends in different countries, so learning another language can help us build bonds with people that speak foreign languages. We must be polite when asking them about their lives and things that they are interested in. Being a nice person and willing to learn about new experiences will help you make friends wherever you go. If we have the chance to travel one day, we may meet these friends face to face. We have to keep in mind that different people in different countries have different cultures and different life styles which enrich our knowledge about various topics. We have to respect other people's privacy and try to learn the best from them.
